

VEL'SHAUN BYERS

Killeen, TX | (816) 809-7899 | vellbyers@gmail.com

Active Secret Clearance | Interim Top Secret/SCI (Awaiting Adjudication) | CompTIA Security+ | U.S. Army Veteran

PROFESSIONAL SUMMARY

Senior Platform and Infrastructure Engineer with 5+ years of experience delivering secure, scalable solutions for defense and government clients. Proven track record across Infrastructure as Code (IaC), CI/CD pipeline development, full-stack application delivery, and information assurance. Experienced with Agile/SAFe methodologies, Linux/Windows environments, automation tooling, and security compliance frameworks including NIST RMF. Active Interim TS/SCI clearance with CompTIA Security+ certification.

EXPERIENCE

Senior Platform Developer

Koniag Gov Services – Dept. of State (Remote) | Mar 2024 – Dec 2025

- Architected and deployed 3 enterprise pilot applications on a no-code/low-code platform for the Department of State, all delivered ahead of schedule under strict government deadlines.
- Designed and implemented role-based dashboards with controlled access, enforcing secure data visibility and access management patterns across department workflows.
- Integrated third-party APIs (Google Translate, reCAPTCHA) to extend platform capabilities, enhance internationalization, and strengthen application security posture.
- Supported versioned production deployments including testing, validation, and post-deployment verification to ensure platform stability and data integrity.
- Collaborated cross-functionally with engineers and stakeholders in Agile (SAFe/Scrum) ceremonies using Jira for sprint planning, backlog refinement, and delivery tracking.
- Applied modularization and reusability best practices to reduce technical debt and increase development velocity across multiple parallel projects.

ISSO (Information Systems Security Officer)

L3 Harris – Rochester, NY | Aug 2023 – Mar 2024

- Implemented NIST Risk Management Framework (RMF) across enterprise-level classified government information systems, establishing and maintaining secure configuration baselines.
- Conducted weekly automated security audits using Splunk and PowerShell scripting, monitoring system integrity and enforcing compliance with classified systems policies.
- Performed continuous monitoring (CONMON) of security controls; executed vulnerability assessments using Nessus and SCAP tools to identify and remediate threats in real time.
- Utilized eMASS to prepare and submit Authority to Operate (ATO) documentation, collaborating with the IS security team on full RMF lifecycle activities.
- Managed service requests and maintenance workflows through ServiceNow and SharePoint Online, ensuring adherence to security protocols and minimizing operational disruption.
- Delivered weekly security briefings to new personnel covering classified systems protocols and best practices.

Software Engineer

MSI Solutions – Randolph AFB, TX (Remote) | Jun 2023 – Aug 2023

- Developed and maintained SharePoint Online applications for the Air Force Education Department, improving organizational collaboration and operational efficiency.
- Led migration of data from ETCA legacy application to modern SharePoint Online platform, ensuring data integrity and continuity throughout the transition.
- Built the TQA SharePoint site using React.js, delivering a modern, responsive interface aligned with mission requirements.
- Leveraged PowerApps and low-code/no-code platforms to rapidly develop automated workflows, reducing manual overhead and streamlining processes.

Software Developer / Junior Systems Administrator

Kings Technology Inc – Navy Warfare Center, Panama City Beach FL | Jan 2023 – Jun 2023

- Contributed to large and small-scale application development projects fulfilling government contracts in a .NET MVC environment.
- Developed web applications, pages, and workflows for the NAVSEA SPO website using C# and JavaScript, with features including interactive calendars and custom UI components.
- Safeguarded confidential and sensitive government information while delivering high-quality software solutions within secure environments.
- Researched and evaluated containerization and cloud infrastructure technologies — including Docker, Kubernetes, and Terraform — to support digital transformation initiatives, laying the foundation for a dedicated focus on modern infrastructure and systems engineering.

Squad Leader / HR Specialist (42A)

U.S. Army – Fort Hood, TX | Sep 2018 – Feb 2021

- Led a 5-person team in high-stakes operational missions, earning recognition as an exceptional soldier for superior leadership and adherence to Army Core Values.
- Analyzed inventory and logistics data using Excel to identify trends, forecast needs, and optimize resource allocation across battery operations.
- Adapted rapidly to dynamic, fast-paced mission environments requiring cross-departmental coordination and operational agility.

Jr. Front End Developer

Acellus – Kansas City, MO | Aug 2017 – Sep 2018

- Built and maintained responsive desktop and mobile websites using TypeScript, Vue, Bootstrap, HTML, SASS, and JavaScript in a collaborative Git-based team environment.
- Directed over 2,000 hours of mentorship and hands-on development, leading junior developers on assigned project deliverables.

TECHNICAL SKILLS

Infrastructure & Automation: Ansible, Terraform, PowerShell, Bash scripting, IaC deployment

CI/CD & DevOps Tools: Jira, Confluence, Bitbucket, Jenkins, GitLab, Artifactory, Git

Operating Systems & Virtualization: Linux (RHEL/Ubuntu), Windows Server, virtualization environments

Containerization: Kubernetes, Docker, Podman (familiar); container-based deployment patterns

Languages: Python, JavaScript, TypeScript, C#, Bash, HTML5/CSS, React, Vue, .NET

Security & Compliance: NIST RMF, ATO/eMASS, Splunk, Nessus, SCAP, CompTIA Security+

Platforms & Tools: ServiceNow, SharePoint Online, PowerApps, Unqork, AWS (familiar)

Methodologies: Agile (Scrum, SAFe), sprint planning, backlog refinement, CI/CD integration

CLEARANCE & CERTIFICATIONS

- Active Secret Clearance | Interim Top Secret/SCI (Awaiting Adjudication)
- CompTIA Security+
- Full Stack Web Development Certification (Python – PDX Code Guild)
- Unqork Novice Developer Badge
- ITIL 4 Foundation

EDUCATION

B.S. in Information Technology

Western Governors University – Salt Lake City, UT | Expected Jan 2027

Python Full Stack Web Development Certification

PDX Code Guild – Portland, OR | Jul – Oct 2022
